ACTIVITY. Today, every walk in life has been divided and sub-divided. Oxford books reflect this progress both in their wide variety and ever increasing number.

A selection of those recently issued.

SPACE AND TIME IN CONTEMPORARY PHYSICS
By MORITZ SCHLICK — *Net* $2.50
An adequate, yet clear account of Einstein's epoch-making theories of relativity.

ON GRAVITATION AND RELATIVITY
By RALPH ALLEN SAMPSON — 90c
The Halley lecture delivered by the Astronomer Royal for Scotland.

SOME FAMOUS PROBLEMS OF THE THEORY OF NUMBERS
By G. H. HARDY — $1.15
Inaugural lecture by the Savilian Professor of Geometry at Oxford.

TUTORS UNTO CHRIST
By ALFRED E. GARVIE — *Net* $2.25
An interesting introduction to the study of religions.

FUNGAL DISEASES OF THE COMMON LARCH
By W. E. HILEY — $5.65
An elaborate investigation into larch canker with descriptions of all other known diseases of the larch and numerous fine illustrations.

THE GEOGRAPHY OF PLANTS
By M. E. HARDY — $3.00
More advanced than the author's earlier work discussing fully the conditions in which plants flourish and their distribution throughout the earth.

SCHOOLS OF GAUL
By THEODORE HAARHOFF — $5.65
An important study of Pagan and Christian education in the last century of the Western empire.

THE ELEMENTS OF DESCRIPTIVE ASTRONOMY
By E. O. TANCOCK — $1.35
A simple and attractive description of the heavens calculated to arouse the interest of those who know little or nothing of the subject.

RECENT DEVELOPMENTS IN EUROPEAN THOUGHT
Edited by F. S. MARVIN — *Net* $3.00
Twelve essays by noted scholars summarizing the work of the leading European thinkers in the last fifty years.

DEVELOPMENT OF THE ATOMIC THEORY
By A. N. MELDRUM — 70c
A brief historical sketch attributing to William Higgins, not John Dalton as generally supposed, priority in the discovery of the theory.

At all booksellers or from the publishers.
